

Thank you for purchasing "Modular Railings Set"

With this asset you can easily design various railings structures.

The length of the base module (mrs_straight) is 1 unit. Elements should be placed in step of 0.5 of unit.

We recommend to combine finished structures into a single mesh.
Information about combining meshes you can find here:

<https://docs.unity3d.com/Documentation/ScriptReference/Mesh.CombineMeshes.html>
